

## External Release Note

Product: Docman 10

Report created at: 12/12/2017 11:36:39

---

Notes / Special Instructions: None.

This release contains the following new features:

<b>TFS ID</b>	<b>Type</b>	<b>Description of change</b>
31794	Change Request	In the capture and filing module, RTF and Doc file formats will follow the same conversion behaviour as other documents. There is no longer a need to select to keep after a conversion. The user now has option to undo rather than revert.
31823	Change Request	Alteration to the validation of ODS codes to accommodate secondary care.
32104	Change Request	When you generate tasks from another task, these subsequent tasks will inherit its priority if it has been set to do so in the task template.
32207	Change Request	Removal of unused database field
32235	Change Request	Allow future event dates.
32241	Change Request	Display the recipient of a task before saving or finishing. This serves as a visual reminder that the task is going to the correct place.
32251	Change Request	Increased clinical code storage
