

## External Release Note

**Product:** Docman 10

**Report created at:** 07/09/2017 16:25:05

**Notes / Special Instructions:** None.

This release contains the following new features:

TFS ID	Description of change
23311	Secondary care related change. We've added the functionality to upload Microsoft Word document templates that contain placeholders for patient information. Once uploaded, actions are available in Tasks and Document Viewer that allow you to select a template and merge the selected patient information into the template before filing the new document against the patient record.
28667	The reference data field has been added to the user interface where extended patient detail is shown.
28668	Secondary care related change. For customers that are not linked to another system that populates their user list, we've added the functionality to upload user information to the system.
28670	Secondary care related change. For customers that are not linked to a clinical system we've added the functions to upload a set of patient information to Docman.
28996	System optimisation.
29049	System optimisation.
29093	System optimisation.
29094	System optimisation.
29096	System optimisation.
29187	System optimisation.
29268	System optimisation.
29271	System optimisation.
29294	System optimisation.
29313	System optimisation.
29712	System optimisation.
29764	System optimisation.
29766	System optimisation.
29791	System optimisation.
29807	System optimisation.
