

External Release Note

Product: Docman 10

Report created at: 21/09/2017 15:28:17

Notes / Special Instructions: None.

This release contains the following new features:

TFS ID	Type	Description of change
28675	Change Request	We've changed what happens when you create a discussion. Now, upon creation the discussion task open automatically so that you can start contributing straight away!
28804	Change Request	Now, you can choose the order of the documents appear in your capture and filing based on the date the document was added. To make this preference go to settings, my profile, filing settings and set the 'Document Sort Order'.
28805	Change Request	If you need to look at the discussions that have been created about a document, you can see the list of discussions from within the 'Discussions' tab launched as part of the document history shown in document viewer.
28848	Change Request	System optimisation.
29095	Change Request	System optimisation.
29151	Change Request	We've made it possible to move up and down document and task lists using the arrow keys on your keyboard.
29152	Change Request	To make adding a clinical code to accompany a document when filing a little smoother, we've added a search box to the top of the list so if you have a long list here you can start typing the name of the item you need and the list will be restricted based on what you type.
29153	Change Request	Now, you can choose the order of the tasks appear in your inbox based on the date that the task was created. To make this preference go to settings, my profile, task settings and set the 'Inbox Sort Order'.
29155	Change Request	When maintaining intellisense, filing, workflow or task templates you can use the search box at the top right of the list to search for the name of the template you are looking for.
29173	Change Request	In your profile settings under the tasks sub-menu we've added setting for you to change the screen layout when in tasks. If you set the 'Show tasks in activity mode' option then the view shown in tasks will remove the task list but show the activity panel next to

		the action panel by default. You can traverse through tasks using the 'previous' and 'next' actions shown at the top of the activity panel.
29177	Change Request	System optimisation.
30021	Bug	A fix was implemented to ensure the the 'Clear all notifications' within the Notifications view clears every notification and not just those that are shown in the view.
30148	Change Request	We've refined the function to upload user profiles based on the results of our internal review. We've changed the way you select the file to import and added some sample files to download.
30149	Change Request	System optimisation.
30154	Change Request	We've refined the function to merge document templates with patient information based on the results of our internal review. We've made the process to file them smoother where no custom fields are in use.
30155	Change Request	We've refined the function to upload patient records based on the results of our internal review. We've changed the way you select the file to import and added some sample files to download.
30162	Change Request	System optimisation.
30179	Change Request	System optimisation.
30341	Change Request	We've changed label on the setting that defines how documents are sorted in capture and filing from 'Document Sort Order (date filed)' to 'Document Sort Order (date added)'.
30342	Change Request	We've refined the function to merge document templates with patient information based on the results of our internal review. Here we've made sure that the option to use a template is not shown if no templates are configured.
