External Release Note

Product: Docman 10

Report created at: 10/10/2017 08:54:01

Notes / Special Instructions: None.

This release contains the following new features:

TFS ID	Type	Description of change
28664	User Story	Secondary care feature. Collections can be configured using windows task scheduler to collect scanned pages that have been sent to a network folder.
28665	User Story	The active tasks chart is now available in the reporting module within the 'Dashboard' tab. This chart shows all active tasks and can be configured at user and organisation level to show the active tasks for selected users or groups. Configuration options are Settings, My Profile, Dashboard. Or to set at organisation it's Settings, Organisation Settings, Dashboard.
28672	User Story	Secondary care feature. Docman can collect e-Rs referrals and deposit them in the capture and filing area of the system.
30477	User Story	Secondary care feature. A setting has been added to the administration console to indicate care setting. Some features are restricted based on this setting.
