

External Release Note

Product: Docman 10

Report created at: 20/10/2017 14:28:34

Notes / Special Instructions: None.

This release contains the following new features:

TFS ID	Type	Description of change
26986	Change Request	System optimisation. Validation has been increased on the 'Users' area in Settings.
26999	Change Request	System optimisation. Validation has been increased on the 'User Groups' area in Settings.
27001	Change Request	System optimisation. Validation has been increased on the 'Categories' area in Settings.
27003	Change Request	System optimisation. Validation has been increased on the 'Workflow Template' area in Settings.
27004	Change Request	System optimisation. Validation has been increased on the 'Task Template' area in Settings.
27005	Change Request	System optimisation. Validation has been increased on the 'Task Comments' area in Settings.
27006	Change Request	System optimisation. Validation has been increased on the 'Picking List' area in Settings.
27007	Change Request	System optimisation. Validation has been increased on the 'Filing Lists' area in Settings.
27011	Change Request	System optimisation. Validation has been increased on the 'Sections' area in Settings.
28671	User Story	Secondary care feature. The ability to accept and process ADT messages has been implemented. For more detail about the message types and message structures see Appendix D of the Docman 10 functional overview.
30461	Change Request	Where documents linked to back office applications are shown in the task inbox or a view the item banner is now interactive so that you can select and edit the back office entry from within the task inbox.
30462	Change Request	The action to capture documents has been added to the action panel in back office applications.
30495	Change Request	Search functionality has been added to the list that is presented when using the 'Create Merge Letter' feature present in Tasks and Document Viewer.
30498	Change Request	The ability to rename custom fields and link picking lists to those fields when designing merge templates has been added.
30499	Change Request	The number of custom fields available when designing

		a merge template has been increased from 5 to 10.
30594	User Story	Secondary Care feature. Attachments can be added to a document using the revisions action. Once the file has been selected the check box to upload the file as an attachment is shown.
30631	Change Request	System optimisation.
30754	Change Request	We've added the functionality to allow due dates to be preserved when tasks are forwarded to other users.
30765	Change Request	System Maintenance. The check for updates will be performed by the service on the next timer interval. This is set to 5 minutes, meaning this is the longest time period they would have to wait.
30817	Change Request	The document library icon is available from the apps menu and will launch document viewer upon selection.
30929	Change Request	Instruction text can now be added to a task if defined as part of a quickstep. The 'Add Instruction' step should be used from the 'Steps' drop down list. This will prompt the user that initiated the quick step for the instruction text they'd like to add.
31100	Change Request	To support delegation of tasks when users are made inactive we've added the ability to create views for inactive users.
31165	Bug	This defect directed users to the 'system down' page rather than the 'incorrect password' screen when an invalid password has been entered. This has been corrected.
