

External Release Note

Product: Docman 10

Report created at: 24/11/2017 08:33:44

Notes / Special Instructions: None.

This release contains the following new features:

TFS ID	Type	Description of change
27851	Change Request	System optimisation.
28074	Change Request	A feature to unlock documents that are locked by another user has been granted to the following roles; Docman System Administrator and Docman Supervisor.
29003	Change Request	The label shown on the Documents List report is either Department or Care Setting depending if SNOMED has been enabled in settings to handle document types and care setting.
30580	Change Request	When filing a Hub document the system will now apply intellisense and show additional values that have detected as part of the existing intellisense findings feature on the filing details screen.
30581	Change Request	We've added an extra warning message before the system allows the contents of the document clipboard are cleared which prompts users for a final confirmation.
30595	Change Request	Results shown from the recently viewed patients action available as part of quick search are now ordered by last viewed at the top.
30885	Change Request	System optimisation.
31019	Change Request	A full screen view of the document is available anywhere a document preview is shown. The full screen icon can be found at the side of the zoom controls at the top of the document preview but shortcut keys of Ctrl + Shift + F can also be used.
31020	Change Request	The rename action is now available for use on documents that have been sent from a Docman Hub and have been delivered it the capture and filing area of the system.
31187	User Story	A new 'Secured Sections' report is available from the 'System Configuration' group in pre-defined reports. This report is only available to the following roles; Privacy Officer, Caldicott Guardian and Restricted Content Manager.
31191	User Story	A new 'Secured Section Items' report is available from the 'System Configuration' group in pre-defined

		reports. This report is only available to the following roles; Privacy Officer, Caldicott Guardian and Restricted Content Manager.
31192	User Story	A new ' Secured Documents' report is available from the 'Documents' group in pre-defined reports. This report is only available to the following roles; Privacy Officer, Caldicott Guardian and Restricted Content Manager.
31458	User Story	System optimisation.
31512	Change Request	To restrict which users can see revisions we have created the 'View Document Revisions' feature. This feature can be added to Custom Roles but is available by default to the following roles; Clinical Practitioner Access Role, Standard Clinical User, Privacy Officer, Docman System Administrator, Caldicott Guardian, Docman Supervisor.
31516	User Story	System optimisation.
31567	Change Request	To remove pages from a document in capture and filing we've added the 'Delete Current Page' action to the action panel.
31610	Change Request	An additional value has been added to the session timeout in settings. Users can now choose to set the timeout to 12 hours.
31611	Change Request	The item 'Reference' has been added to the default search options in settings.
31613	Change Request	The action to view a patient record in the clinical system has been added to the document review creation screen.
31669	Change Request	We've made some improvements to the way that intellisense detects dates. The system will look for a consistent separator between each part of a date (e.g. space, slash, hyphen).
