V68

docman
delivering paper free care

Product: Docman 10

Notes / Special Instructions: None.

This release contains the following new features:

TFS ID	Type	Title/Description	Area of Docman 10
32768	Change Request	Workflow: Old audit from Docman 7/8 now shown in Docman 10 audit as a Legacy Audit Event. When audit is migrated from Docman 7 or 8 workflows, they are added as a legacy audit event in the document history timeline.	Tasks > choose document > Show Activity or Tasks > Choose Document > History (right side of the screen)
32853	User Story	Tasks: Comments can now be expanded on task cards. Comments that have been added within tasks can now be shown on the task cards. The option to expand the task card to show all comments added when the task card is selected is available as an option from within My Profile Task Settings and Expand Comments in Task List.	Tasks > Choose document > Add comment (right side of the screen) > type comment and click save > The task will be back in the task queue with your comment added and you can dropdown to see this You can also configure this by going to Settings > My profile > Tasks Settings > Select Auto Expand Comments in Task Lists.
32987	Change Request	SNOMED CT: Restricted to UK Primary Care Reference Set.	In preparation for the implementation of SNOMED CT we have restricted the codes we present to use only the UK Primary Care Reference Set.
33393	Change Request	Tasks: Warn user that activities will be lost if not saved A message is presented when users switch task or click an action that will navigate away from the task viewer, if they have unsaved actions.	In tasks > choose document > make changes on the left side > if you have not saved the changes you have made a message will pop up to let you know that you will lose your actions if you navigate away from the screen.
