This document contains confidential and / or proprietary information. The content must not be disclosed to third parties without the prior written approval of Advanced Computer Software Group Limited or one of its subsidiaries as appropriate (each referred to as “Advanced”). External recipients may only use the information contained in this document for the purposes of evaluation of the information and entering into discussions with Advanced and for no other purpose.

Whilst Advanced endeavours to ensure that the information in this document is correct and has been prepared in good faith, the information is subject to change and no representation or warranty is given as to the accuracy or completeness of the information. Advanced does not accept any responsibility or liability for errors or omissions or any liability arising out of its use by external recipients or other third parties.

No information set out or referred to in this document shall form the basis of any contract with an external recipient. Any external recipient requiring the provision of software and/or services shall be required to enter into an agreement with Advanced detailing the terms applicable to the supply of such software and/or services and acknowledging that it has not relied on or been induced to enter into such an agreement by any representation or warranty, save as expressly set out in such agreement.

The software (if any) described in this document is supplied under licence and may be used or copied only in accordance with the terms of such a licence. Issue of this document does not entitle an external recipient to access or use the software described or to be granted such a licence.

The development of Advanced software is continuous and the published information may not reflect the current status. Any particular release of the software may not contain all of the facilities described in this document and / or may contain facilities not described in this document.

Advanced Computer Software Group Limited is a company registered in England and Wales with registration number 05965280 whose registered office is at Ditton Park, Riding Court Road, Datchet, Berkshire. SL3 9LL.

Overview

This release reflects the work carried out by the development team in Sprint 140 and 141.

RMS Changes

This release contains the following RMS specific changes:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
DRM-63		Feature	Enhance the eRS collection screen to provide more clarity to Users on collection status and reconciliation of collection stats	In order to provide more clarity to the User regarding an eRS collection, the Docman RMS collection screen has been updated to clearly inform Users of the collection status as well as collection statistics. The enhanced Collection screen will now display: • An eRS collection config summary • A summary for each category along with status updates as the collection is processing. • Each list can be expanded to show UBRN's For each warning message, Users will be required to take the necessary action required to ensure that the collection is resolved and complete.

GP Changes

This release contains the following GP specific changes:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
D10-4751	21846374	Defect	Sites unable to update their NHS Password in Docman 10	An authentication error has resulted in some sites not being able to update their NHS Mail password when a collection has failed. This has now been rectified by implementing the Office 365 service to access NHS mail so that Users can successfully update their password from within Docman.
D10-5096		Bug	Auto-registration match on NHS number	The patient lookup in Docman will now use the NHS number to match a patient in PATCHS as part of the auto-registration process. If there is no NHS number to match the patient then the lookup will fall back to matching based on forename, surname & DOB.

General changes

The following changes have been made that are non-specific to RMS or GP:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
D10-4694	21831458	Defect	Occasionally categories are not searchable when creating a review	When clicking on the Patient banner at the point of filing, this removed the ability to search within the dropdown when Creating a Review. A fix has now applied to remove the linkage between these two areas which means that this issue will no longer be trigged if a User clicks on the Patient banner.
