Defect Fixes

Some documents can be updated so they don't appear in Filing

Case 23804123; Internal reference D10-12916 & D10-12906

Description

Documents can be renamed by Docman which can cause people to 'lose the document' so they were not appearing in Filing.

This was caused by a caching issue that was causing a system error in how documents were assigned to folders, when an Intellisense template set to assign a folder for DOCX/PDF was used.

Performance Enhancement – Remove invalid redirect

Internal reference D10-13140/D10-13120

Description

A review of non-invasive to Customer error messages found a reoccurring invalid redirect error. This is not visible to Customers but could impact performance. The invalid redirect has been removed.

SCI Gateway: Supported mime types not working

Internal reference D10-13199

Description

Mime types txt, bmp, video, wav were causing a "400 Bad Request error"

The following mime types are confirmed as supported: application/postscript (.ps), audio/wav (.wav), image/bmp (.bmp), text/plain (.txt, .text), video/avi (.avi), video/mpeg (.mpeg) and video/quicktime (.mov) and have been added to the SCI Gateway API

Scotland - SCI GW Folder Count Issue

Internal reference D10-13369

Description

Folder counts are for the total and not individual folders.

Scotland – Patient Sync to Incorporate User Sync

Internal reference D10-13471

Description

Vision patient sync for Scotland need to use User as well as Patients.

Kind Regards, The Docman GP Team
