Docman 10
ICP.2019.R5.105/106
External Release Notes

Report created at: 06/11/2019

Notes / Special Instructions: n/a

Please note that Release 105/106 is currently only available to RMS customers. Further updates coming soon.

This release contains the following items:

JIRA ID	ServiceNow Ref	Area	Type	Title	Description
D10-1876	CHG0001409	RMS	Feature	Be able to annotate in the docs screen not just workflow & filing	This feature allows users to annotate a document from within the patient record. The option will not however be available if the document is already under review. If the erase or redact feature is used these actions will appear in the document history.
D10-1877	CHG0001410	GP	Feature	The ability to lock specific reports so they are only visible to specific users/groups	A new feature has been created called “Manage report access.” Once this feature has been assigned to a user role they will be able to determine user/group access to each report. By default, all users will have access to the reports.
D10-1912	N/A	GP	Feature	Add DM7 GP2GP Import support	A new feature has been added so that when a patient moves from a Docman 7 to a Docman 10 practice they can import the patients previous documents.
D10-1916	CHG0001462	GP	Feature	Vision Sat Pack – Separating scanning buttons	In the Desktop App window, when scanning documents, the “Send to Folder” & “as individual pages” options have been separated out in to two different buttons.
D10-1955	CHG0001400	GP/RMS	Feature	RMS Sat Pack – Search for a task using NHS number	A new task search criteria has been added so that you can search for a task using the patient NHS number. However, if the NHS number of a patient changes, it will not pick up previous tasks.

D10-1960	N/A	GP	Feature	GP IT Futures – Search Document Content	There is a now a “search document” option available in the side pane when viewing a document. This allows users to search specific content within a particular document. A maximum of 30 characters of text can be entered in to the search box and any instance of the searched term will be highlighted within the document. This functionality can be switched on by going in to the organisation settings.
D10-1962	CHG0001460	GP	Feature	Vision Sat Pack – Instructions added to audit	A change has been made so that any instructions added when creating a review will appear in the document history. This also applies when viewing the timeline of a document.
D10-2238	Barndoc Project CHG0001390	RMS	Feature	Document description & referral type column added to the report	A document description & referral type column has been added to the breach report.
D10-2239	Barndoc Project	RMS	Feature	Referral export Report	A document description column has been added to the Referral Export Report.
D10-2236	Barndoc Project	RMS	Feature	Re-triage documents are being calculated on 48 hours instead of 72 hours	This has now been amended so that re-triage documents are being calculated on 72 hours rather than 48 hours.

*Please do not use the GP2GP feature as currently it is not fully operational but has been added as a GPTIF feature. More coming soon.
