External Release Notes

Report created at: 08/01/2020

Notes / Special Instructions: *A new Integration API has been developed to replace the current Emis Partner API. This will initially only be available for sites participating in the FOT process.

This release contains the following items:

JIRA ID	ServiceNow Ref	Area	Type	Title	Description
D10-2237	Barndoc Project CHG0001387	RMS	Feature	Increase the size of the outcomes text box	The size of the outcomes text box has been increased so that a user can now see clearly what they have written without having to move backwards and forwards.
D10-2330	Barndoc Project DFCT0011254	RMS	Defect	Copy & Paste URBN with on spaces	When copying a URBN number in to the URBN box it now removes the spaces between digits so the user no longer has to do this manually.
D10-2381	DFCT0011291	GP	Defect	Sending to Everyone also sends to inactive users	When sending a workflow, if the reviewer is set to Everyone and Completion type is set to All Members, even inactive users were required to complete the task. This prevented the workflow from being completed and so it continues to be marked as under review. Whilst in this status the document cannot be deleted if required. This has now been resolved
D10-1792	DFCT0011276	GP	Defect	Task views date range not applying	When using a task view to display all tasks completed within a given data range, it would display all completed tasks rather than respect the given data range. This issue has now been resolved.
D10-2452	DFCT0011329	RMS	Defect	Slowness in RMS affecting viewing document history & loading report filters.	When viewing document history and loading various report filters, users identified that it was taking a lot longer to load the information and also resulted in displaying 'report unavailable' error. Amendments have now been made to resolve this issue.

D10-2232	CHG0001528 Vision Project	GP	Feature	Config amendments for filing & coding	As a Docman System Administrator it is now possible to set a default priority at organisation level for filing documents so that filed and coded documents mirror how they file in the clinical system.
D10-2557	DCFT0011336 Barndoc	RMS	Defect	Breach Report produces wrong calculation if referral falls on a weekend	When the referral receipt date is on a weekend e.g Saturday, because it falls out of the mon-fri timeframe the report would use the Monday and the initial time that the referral was received rather than Monday 9am producing the wrong calculation. This has now been resolved to produce the correct calculation.
D10-2400	GPIT Futures	GP	Feature	Search Document Coded Entries	A change has been made so that users now have the ability to search for clinical codes as a search criteria. This change only applies to Snomed codes.
D10-1953	RMS SAT PACK CHG0001388	GP/RMS	Feature	Failed NHS Mail Notification	A change has been made so that when task notification is received to say that an NHS mail collection has failed it will also include the email address of that collection.

Screenshots

D10-2235 Increase size of Outcomes text box

The screenshot shows a dialog box titled "Referral Outcome" with a blue header. Below the header, the text "Please enter a referral outcome" is displayed. A large, empty text input field is centered in the dialog. At the bottom right, there are two buttons: a green "Ok" button and a white "Cancel" button with a grey border.

D10-2338 Config amendments for filing & coding

The screenshot displays the "Clinical System" configuration page within the "Settings Console". The left sidebar shows the navigation menu with "Clinical System" selected under the "Integration" section. The main content area is divided into three sections: "Clinical Coding", "Synchronise", and "Security".

Clinical Coding

- Clinical Code Type: Snomed
- Allow Get Medical History
- Default Clinical Code: Medium
- Clinical Code: High, Associated Vision Mapping: 4
- Clinical Code: Medium, Associated Vision Mapping: 9
- Clinical Code: Low, Associated Vision Mapping: 6

Synchronise

- Enable Patient Synchronise
- Last run: 01-Aug-2018
- Synthetic Patient Types: Other
- Use a comma "," delimiter to separate multiple values.
- Enable User Synchronise
- Last run: 28-Apr-2017

Security

- Automatic Sign On
- Automatic Sign On Method: Active Directory

An "Update" button is located at the bottom of the configuration page.

D10-2400 Search Document Coded Entries

The screenshot shows the dm (Document Manager) Advanced Search interface. The search criteria panel on the left is empty. The main search area displays a message: "Please enter search criteria in the left panel and click the Search button to display any results." The interface includes a search bar, filters, and a search button.
