

External Release Note

V69

Product: Docman 10

Notes / Special Instructions: This is an updated version

This release contains the following work items:

TFS ID	Type	Title/ Description	Area of Docman 10
206	User Story	Reports: Additional filter required on the document list report. We've added an option to search for words within a document using the filter shown	on the Document List report. This can be found by going to Apps > Reports > Documents > Document List > choose at least one report criteria from the 'Report Filter' on left side of the screen > choose 'Document Content' and 'Contains' from the dropdown > type your chosen search word in the free text box below (type over the grey scale word 'value') > then choose 'Run Report'
232	User Story	Reports: Edit and Delete entries in My Reports	Features have been added to edit and delete reports shown within the 'My Reports' group in the reporting module. This can be found by going to Apps > Reports > My Reports on the right side of the screen (this dropdown only appears once you have previously saved reports) > choose your required report > you will then now see an 'Actions' panel on the left side of the screen with 'Delete Report' and 'Edit Report Name' below it.
263	User Story	Conversion: Review and improve performance System optimisation to improve the time taken to convert documents.	In filing or Apps > Libraries, when converting a document it will no longer lag.
264	User Story	Add file type to white list	The file format 'TIFF' has been added to the Docman White List, meaning this type of document can be imported into Docman 10.
265	User Story	Handle Intellisense Failure	System Optimisation. A message will show when it has not been possible to use

			<p>intellisense to process a document.</p> <p>Tasks > choose specified document > click file > choose 'Intellisense' > a message will appear if this action cannot be completed.</p>
266	User Story	Review System Performance	<p>System maintenance.</p> <p>Need info</p>
267	User Story	Azure AppInsights & Raygun - Implement telemetry recording	<p>System maintenance.</p> <p>Ability to measure performance and environment metrics to help improve application performance and troubleshoot performance related issues.</p>
268	User Story	Collect telemetry and pass to Snow	<p>System maintenance.</p> <p>The development team have implemented a method that provides Docman with high level metrics for monitoring the use of Docman 10 as well as reporting on the EUIT metrics to NHS Digital.</p>
269	User Story	Transaction Discovery	<p>System maintenance.</p> <p>Optimisation of the code set in Docman 10</p>
270	User Story	Option to set the offline errors folder location	<p>System maintenance.</p> <p>Docbot modification</p>
271	User Story	Switch to Shared ENUM	System maintenance.
272	User Story	Raygun - Implement Error Logging	<p>System maintenance.</p> <p>Implement logging into Raygun Performance Tool.</p>
273	User Story	Black List: Add file type docm to the black list	<p>The file format 'docm' has been added to the Docman Black List.</p> <p>You no longer have the ability to import a file type of 'docm'</p>
364	User Story	Object Storage Keys - Optimisation	System Optimisation.
377	User Story	Reports: Create features to access reports	<p>Access to reports is now managed as a feature that can be applied to custom roles rather than just the inheritance of Docman pre-defined roles.</p> <p>***Please note: No modifications are required for existing users that relied on the roles to manage this, these roles have had the relevant features applied automatically.</p>

			This can be found in Settings > Roles > click 'create custom role' and choose your required features from the dropdown.
395	User Story	Remove logging to vault database	Culture setting enabling for Ireland. As part of our ongoing relationship with Ireland we have enabled 'English-Ireland' language function in the system
418	User Story	DTA Service - Telemetry Issue	System maintenance. Ongoing security management.
