

External Release Note

V73

Product: Docman 10

Work Item Type	Title	Description
User Story	DTA Updated Message HOTFIX V73	The message users can see when the Desktop Application has been updated has changed to make it more clear.
Bug	File Association Issue with Desktop App HOTFIX V73	Can now be installed and run with no problems.
User Story	Multi-Cluster Support	System Optimisation Work to make it easier to distribute tenants across Clusters. This will ensure performance is improved.
User Story	Connection Pooling	System Optimisation
User Story	Report for Read Codes when moving to SNOMED CT Codes	A report has been created for all read codes saved into filing templates, predefined codes and filing lists to allow for a smoother transition to SNOMED CT codes. This can be found by going to: Settings > Filing > Templates > Intellisense Templates or Predefined Templates
User Story	Document staying locked	We have fixed an issue that was keeping a document locked continuously if another user had it open on their screen. The document will now appear locked for around 5 minutes if another user is on the document.
User Story	Secondary Care NHS Number issue	An issue has been fixed where a number of senders are supplying a hospital number instead of a valid NHS number. We have removed the NHS Number Validation and blank number check from Docman 10.
User Story	Secondary Care eRS – Accept & Reject (Phase One)	For eRS referrals, we now have the functionality in Docman 10 to ‘Accept’ or ‘Reject’ a referral that has come through via eRS. This will update in eRS. If ‘Reject’ is used, a reason will be required for this.

User Story	Secondary Care eRS Audit changes	Improvements have been made to the eRS Audit to adhere to what eRS have supplied.
User Story	Secondary Care eRS Automatic stamp for Accept & Reject	When creating a quickstep for Accept or Reject, users now have the option to add a stamp. Every time a quickstep is used for Accept or Reject, it will automatically add a stamp with the text of Accept or Reject (or the text that is set up in the quickstep).
