

# Connect 103

## Release Notes

Report created at: 13/09/2019 10:00:00

Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-1797	N/A	Bug	Unable to Update and Resend SOAP documents	Documents sent via SOAP did not have the action to "Update and Resend". In order to keep the functionality in-line with the REST API the same functionality is now available for SOAP documents.
D10-1817	N/A	Change	Manually enter Org code - Collection console	In a previous Connect release we provided the ability to manually enter ODS/Organisation codes for Sending Organisations rather than automatically creating an Org code for the customer. This functionality is now available for Collection Organisations.  <a href="#">Screenshot 1: Manual Org Code</a>
D10-1841	CHG0001446	Change	New user creation email	Currently when a new user is created, the user will receive a single email with the password for their user account. A new user creation email has now been added which will send an initial email to the new user which will include the following: <ul style="list-style-type: none"><li>- Organisation Code</li><li>- Username</li><li>- URL (link to the Connect UI)</li></ul> A second email will then be sent to the new user which include the users password.  <a href="#">Screenshot 2: New User</a>
D10-1853	DFCT0011284	Defect	Capture Console colour conversion	After conversion, documents were not showing true colour. After investigation we found that documents were converting in 8 bits per pixel, this has now been changed to 16 bits per pixel.  <a href="#">Screenshot 3: Colour Conversion</a>
D10-1856	N/A	Bug	Unable to edit consumers	Functionality to edit an existing Consumer has now been provided.

				Screenshot 4: Edit Consumer
D10-1880	N/A	Bug	Unable to post to DM10 via Capture Console	An issue was found where attempting to send any document to DM10 via the Capture Console whereby the console would timeout and no errors would be logged. This has now been fixed and should now work as intended.
D10-1895	N/A	Bug	Unable to post to DM10 from Non N3 Capture Console	Non N3 Console users were unable to post to DM10 as the file size check was failing.

## Screenshots/Test Evidence:

### Screenshot 1: Manual Org Code

**Create Organisation**

**Organisation Type \*** Collecting Organisation

**Organisation Code \*** 123CollMe
