

# Connect 105

## Release Notes

Report created at: 10/10/2019 14:00:00

Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-1921	N/A	New Feature	Capture MH Discharge: Populate required data lists & validation	As part of the Sending FHIR to MESH practices project, the 'Capture Mental Health Discharge' page has now been created however, data lists and validation was not present. We have now added all data into the data lists and validation against all relevant fields within the 'Capture MH Discharge' page.
D10-2054	DFCT0011289	Defect	Unable to Merge and Continue on Capture Console	After the upgrade to Connect 102, users were unable to merge documents and post the documents through the Connect service. Either the page would hang on loading or the user would be presented with a blank white page. This issue was caused by an incorrect database query being run when the user tries to merge, this has now been amended and this functionality is now working as intended.
D10-2102	N/A	Defect	ConnectBot - PdfConversion remove greyscale pdf conversion due to memory leak in Aspose.Pdf	When converting from an Image file (e.g. TIF, JPG, PNG) to PDF, if the consumer is not set to use colour then the PDF gets converted to greyscale which uses a part of the Aspose.Pdf library which has a memory leak. Unfortunately, this issue is a bug within the Aspose library so the only way to resolve this issue was to force all documents being converted to PDF to use 32bit colour.

Screenshots/Test Evidence: N/A
