Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-2455	N/A	New Feature	FHIR: Unable to set non mandatory/mandatory drop down options back to unselected	After selecting an option from the drop-down lists provided in the TOC document creation, there was no way to set the field back to unselected (default). This has now been changed so that these fields can be set back to unselected.
D10-2480	N/A	Change	SUPPORT: Error Dm7 undelivered document instead of rejecting	DM7 undelivered documents that weren't collected by a DM7 practice were previously being rejected back to the sender, these documents should have initially be set to errored in order for the support team to handle as necessary before passing back to the sender if required. Documents that fall under this criteria will now be errored instead of rejected allowing the support team to now resend the documents if needed.
D10-2504	N/A	Change	SUPPORT: Unable to deliver document - Increase number of documents that can be bulk resent	Due to historic issues the Support teams were struggling to handle documents in a timely fashion due to the limitation of how many document could be bulk resent and how time consuming the process of handling these documents can be. In order to improve the process support follow we have now increased the number of documents that can be resent from 50 to 100 documents. Screenshot 1: Bulk Resend

Screenshots/Test Evidence:
