Connect 112
Release Notes

Report created: 13/01/2020 10:00:00

Notes / Special Instructions: N/A
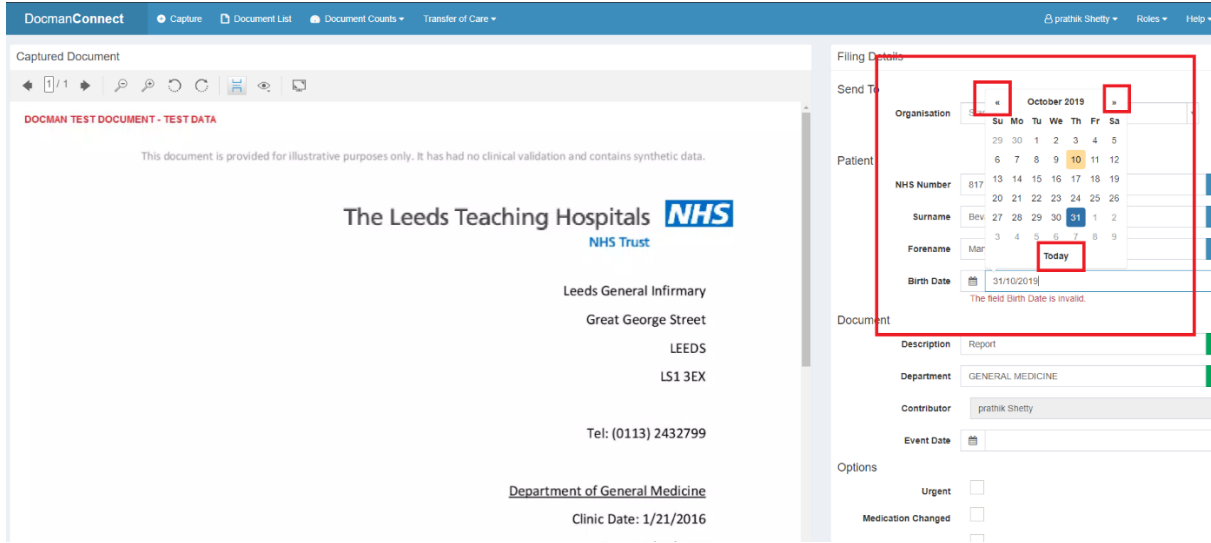

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-1929	N/A	New Feature	Send a FHIR message to an endpoint: Handle responses from FHIR	The ability for Connect to be able to handle response back when sending a FHIR message has now been added. This will allow Connect to deal/handle documents in the appropriate way based on the responses Connect gets back from a FHIR endpoint.
D10-2180	N/A	Bug	e/MH-discharge page: DOB field to include left and right arrow in place question mark and also to include Today text at the bottom	A bug was found in the QA environment when selecting from a date picker, the arrows used to change the month from the date picker were showing as question marks. The arrows now show as expected and minor improvement to the date picker have also been made. Screenshot 1: DOB Field
D10-2305	N/A	Change	Move the GP Lookup onto the GP Practice Identifier field	GP lookup changed from separate field and moved into "GP practice identifier" field. Screenshot 2: GP Lookup
D10-2474	N/A	Change	Change 'Save' button to 'Post'	When sending a transfer of care document from Connect the post button was named "Save". Since there is currently no save functionality when creating a TOC document the button has been amended to "Post". Screenshot 3: Post
D10-2487	N/A	Change	UI fixes when creating FHIR Document	UI changes have been made to the way the FHIR TOC documents are created in order to improve the overall UI and make a better user experience.
D10-2470	N/A	New Feature	Allow adding more than one allergy	During the creation of TOC documents, it is now possible to add, edit and remove

				allergies (this includes the ability to add more than one allergy).
