

# Connect 113

## Release Notes

Report created: 20/01/2020 11:00:00

Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-2379	N/A	New Feature	DMC Logging: All logging information stored in a central location	Serilogging now added to the Connect console, Connectbot & API.
D10-2448	N/A	Change	Add Consumer limit total to limit warning	A new feature was added to Connect previously which enabled limits to Consumers created per organisation. A change has now been made so that Sender Admin users can now see the amount of consumers their organisation is allowed to configure. This can be found in the warning when attempting to create a new consumer.
D10-2544	DFCT0011282	Defect	Word documents cut off from filing section	RTF documents downloaded from NHS mail were cutting off pages when in the filing section of Docman 10. The problematic document is now resolved however more documents have been identified and the issue now seems to be a bug with the Aspose library. This has been raised with Aspose however no further fixes have been provided.
D10-2629	Internally Raised	Defect	32bit Connect Printer Driver installing as 64bit Driver.	When users were trying to install the 32bit Connect printer driver, they would receive a message stating "the installation files are meant for 64-bit and not 32-bit". A new build has now been provided which now installs as 32-bit as expected.
