Connect 120
Release Notes

Report created: 05/05/2020 09:30:00

Notes / Special Instructions: n/a.

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-2044	NA	Change	ToC E-Discharge/MH-Discharge Icon change on drop down	When using the Connect console, the Transfer of Care E-discharge and MH-discharge drop down options were using the document list icon. This has now been changed to the FHIR icon used in the documents list.
D10-3020	CHG0001578	Change	Able to see date of last logon when accessing the manage users screen	When accessing the managed users screen, users will now see the last logon date for each user which will make it easier to manage inactive users.
D10-3144	NA	Bug	Total items should change on Filtering the consumer page for a sending user	When filtering on the consumers page, the total number of items is presented. This was showing incorrect counts however this has now been resolved and now works as intended.
D10-3190	CHG0001647	Change	"Source Group" field is case sensitive	When posting a document via the API, "Source Group" field was case sensitive. This has now been changed to be non-case sensitive.
D10-2987	NA	Bug	DOB formatting issue	When posting a document, if an incorrect format was used for the DOB, the date would convert to default (0001-01-01 00:00:00). This has now been fixed and now rejects the document if the format is incorrect.
