

Connect 126

Release Notes

Report created: 03/08/2020 09:34:00

Notes:

Although this release and future releases may contain work related to FHIR Transfer of Care, this functionality is not yet currently available.

This release contains the following items:

API

JIRA ID	SF/Ideas Ref	Type	Title	Description
N/A	N/A	N/A	N/A	N/A

Console

JIRA ID	SF/Ideas Ref	Type	Title	Description
DCMC-36	DICP- -132	Story	Allow the capability to search for Document IDs	The filters provided on the documents list only provided document GUID as the document identifier however many users use the document IDs provided on the document list itself. A change has been made which allows users the ability to search for document ID as well as document GUID.
DCMC-65	N/A	Bug	User Creation – Email field cleared when username field fails validation	When creating a new user, if the username field failed validation for any reason then the email address field would be cleared forcing the user to re-type the user details. This no longer occurs, and user creation now works as expected.
DCMC-24	N/A	Bug	Change console to allow all file types included in conversion	A change has been made to allow certain file types that already exist in the conversion settings in Connect. This is to maintain consistency with the API. New file types accepted by the Connect console include: <ul style="list-style-type: none">- JPG- JPEG- PNG- XPS
DCMC-71	N/A	Bug	Sending User: Capture Document page UI/UX issues	A few minor UI alignment issues were identified in the filing details section when capturing a document. These have all been amended and there should not be any further alignment issues within the filing details section.

DCMC-72	N/A	Bug	Document List: Clicking text in row should go to document details	When clicking on text in a row in the document list, the console should take the user to the document details page for the document selected. This was not the case and instead failed to re-route the user to the appropriate page. This have no been fixed and when clicking on text in a row, the document details will now be presented as expected.
