

Connect 130

Release Notes

Report created: 25/09/2020 09:30:00

Notes:

Although this release and future releases may contain work related to FHIR Transfer of Care, this functionality is not yet currently available.

This release contains the following items:

API

JIRA ID	SF/Ideas Ref	Type	Title	Description
DCMC-257	N/A	Bug	129.2 Hotfix - Mapping of 'Sending Person' from SOAP service	An issue was found when using the document list export functionality. The "Person" field was showing blank; the sending person not being mapped from the SOAP service to the database caused this. This has now been mapped and the sending person should now show in the document list export.

Console

JIRA ID	SF/Ideas Ref	Type	Title	Description
DCMC-11	N/A	Change	HTML document formatting issues	An issue was identified when sending HTML documents where tables were being squashed to A4 making the data unreadable. This was actually a bug found with the 3 rd party software being used for conversion (Aspose). Aspose has now been upgraded to a later version which has been found to resolve most of the formatting issues.
DCMC-182	DICP-I-131	New Feature	Secondary identifier to be added to organisation selection drop downs	A new secondary identifier has been added to organisation selection drop down list to aid with identifying the correct organisation when the names are similar. The connect console will now show the organisation code in front name.
DCMC-209	N/A	Bug	File Types available to use in Capture Console are not filtered in File Explorer	When selecting documents to Capture into the Console, the file types were filtered without the new JPG, JPEG, PNG, XPS file types that were added in DCMC-68. An amendment has now been made to include the file types above.
DCMC-219	N/A	New Feature	Implement Filing Folder API check for collection setup	When making a collection on Connect for DM10 collections and finds the associated filing folders for the particular tenant.
DCMC-222	N/A	Bug	Collection user: Document counts not matching.	When logged in as a collection user the document counts were not matching the results provided when clicking on one of

				the document count tiles. This has now been amended to show to correct counts against all tiles and the document list will now match.
DCMC-223	N/A	Bug	Sending user: clicking on any items in documents counts for first time, it is navigating to the error page.	When logged in as a sending user, if a user clicked on one of the document counts tiles for the first time, an error would generate. This error no longer occurs and allows the user to navigate to the document list when clicking on one of the document count tiles.
DCMC-256	N/A	Bug	Message banner does not close when user clicks on close icon	On the Connect console, if a user performs an action that generates a message banner, users were unable to close the banner using the close icon. A fix has now been applied and users can now close the message banner if needed.
DCMC-267	N/A	Bug	Connect console - Sorting not working for collection & PCTI users in document list	When logged in as a collection or PCTI user, the sorting options were not being applied when selection a new option e.g. 'Ascending'. This has now been resolved and the sorting options should now work as expected.

Infrastructure

JIRA ID	SF/Ideas Ref	Type	Title	Description
DCMC-277	21786516	Defect	Hotfix NHS mail collections failing since NHS mail refresh	Due to an NHS mail migration from NHS mail to Office 365 some NHS mail collections were failing as the new address needs to be used. A hotfix has been created for 129 which implements a code change in ConnectBot to take into account the new URL. As the mailboxes move over, ConnectBot will automatically check any collections that fail to connect to the old URL and checks to see if the O365 URL works and use that. A flag has also been added on the collection, so as mailboxes move over, they automatically get updated and the O365 URL gets used from then onwards.
