Connect 91
Release Notes

Report created at: 01/04/2019 10:25:00 AM

docman
delivering paper free care
an ▲advanced company

**Notes / Special Instructions:** N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-77	CUSTOMER REQUEST	Change	Move of document data to document details tab.	Standard document data (not including PID) has now been moved from the 'Meta-data' tab and now shows in the 'Document Details' tab. SCREENSHOT: 1 – Document Details
D10-859	INTERNALLY LOGGED	New Feature	Toggle number of documents per page.	Within the 'Connect Documents' page you now have an option to select the number of documents per page in increments of 10 (10-50). 20 documents per page is set by default. SCREENSHOT: 2 – Toggle number of documents
D10-971	INTERNALLY LOGGED	Bug	Timeout on password reset failures.	When a new user account was created but the login details failed to send to the email address specified, the console would hang, eventually timeout and the user would not get their login details. A change has now been made to generate an error message and also deny the new user account from being created.
D10-975	CUSTOMER REQUEST	New Feature	Export functionality for Organisation users.	When accessing the 'Manage Users' page as a Sender administrator, you will now see an option in the bottom right called 'Export Users'. This will export a list of users under an Organisation into a CSV file. SCREENSHOT: 3 – Export Users
D10-1102	INTERNALLY LOGGED	Bug	Non-N3 Multi-factor authentication.	An issue was raised for non-N3 users as the MFA was failing to generate QR codes. The QR code library has now been updated and MFA now works as intended for non-N3 customers.

Screenshots/Test Evidence:

1. Document Details:

2. Toggle number of documents:

3. Export Users:
