Connect 94
Release Notes

Report created at: 10/05/2019 10:30:00 AM

Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Type	Title	Description
D10-721	LOGGED BY CUSTOMER	Bug	Documents not unlocking from Delivery Console	Users found that when uploading documents to the Delivery console, if the browser was to close for any reason the document would remain locked and not show for the user in the delivery console documents list. A fix has now been put in place to unlock any locked documents on login.
D10-967	INTERNALLY LOGGED	Bug	Organisation filters not being applied	Certain user roles were experiencing issues when filtering on the Organisations page whereby checkboxes would be unchecked upon applying filters which caused confusion. Filtering on this page has now been resolved and the filters will now reflect the applied filters.
D10-982	LOGGED BY CUSTOMER	Bug	Request Password button throwing an error when no email is present	When attempting to reset your password using the request password option, if no email address is present under the user account then an error was thrown. This has now been changed to present an error stating that no email address is present and the password reset email could not be sent.
D10-1030	INTERNALLY LOGGED	Bug	Document List: Unable to filter by information	An issue was found when filtering on the documents list using the 'information' filter. When applying the filter criteria the 'information' field would be cleared. This has now been resolved and the 'Information' criteria will no longer be cleared.
D10-1146	INTERNALLY LOGGED	New Feature	Setup MESH practices without a MESH mailbox	A new feature has been added which allow the configuration on MESH practices without a MESH mailbox ID present. This will allow new MESH practices to be configured within Connect instead of waiting for a MESH mailbox to be provided.

D10-1150	LOGGED BY CUSTOMER	Bug	Export Print Keys - Key formatting	Some customers have experienced print key formatting issues when exporting a list of print keys. The formatting issue is caused by the values present at the begging of the key and how MS Excel handles these values. In order to around this issue Connect will now export the list as a text file instead of a CSV file.
D10-1210	LOGGED BY CUSTOMER	Bug	Connect not marking DM7 documents as urgent	When marking Connect documents as urgent an issue was found on Docman 7 practices whereby the urgent documents were not showing the urgent status. This has now been resolved and all urgent documents will now show as urgent for all DM7 practices.

Screenshots/Test Evidence: N/A
