Contents

Overview 1
API Changes 2
Console Changes 3
General changes 5

Overview

This release contains sprints 132, 133 and 134, which includes a number of internal and external change request, design work related to the SQS project and analysis items for PEPR integration.

API Changes

This release contains the following API specific changes:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
N/A	N/A	N/A	N/A	N/A

Console Changes

This release contains the following Connect Console specific changes:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
DCMC-178	N/A	Story	DMC | 5 | Add Pendo Resource Centre onto Navigation bar	This adds new functionality to Connect, which allows the functionality to provide updates and alerts through the application.
DCMC-183	N/A	New Feature	Download document option in Docman Connect Console	The ability to download rejected documents by has now been added to Connect for sending users. On download, the documents will be set to 'Rejection Resolved' status with a notification making the user aware of this. Users can also download rejected documents on bulk using the checkbox functionality on the documents list.
DCMC-274	N/A	Story	DMC | 6 | Timestamp to be added to "last Collected" on Doc Collections	As a PCTI user, you will now see a timestamp along with the date when viewing collections on Connect. This will allow the support teams to monitor collections more accurately, improving the level of support provided.
DCMC-275	N/A	Story	DMC | 7 | Miss-leading sorting options on Connect	On the documents list, a new sorting option of 'Created date' has been added. Users can now sort from ascending to descending order. The option to sort by 'last updated' is still available.
DCMC-340	N/A	New Feature	DMC | Print System Errors	Sending users now have the ability to download documents in 'system error' status. When doing so, documents will automatically be set to 'rejection resolved' status. IMPORTANT: It is not possible to download system errors in bulk; each system errored document needs to be reviewed individually.
DCMC-377	N/A	Bug	Date-picker option is not displayed properly	A bug was identified when using the trying to use the data selector in the advanced filtering on the documents list. When clicking the date field, the data selector was not appearing. This has now been resolved and now works as expected.
DCMC-396	N/A	New Feature	Delivery Management - uncollected endpoints and errors summary report	A new export button has been added to the Dashboard page for PCTI users that will download a CSV file, which includes any sites that have not collected in 24hrs, the number of system errors for the particular sites along with the number of documents waiting in total. By adding this functionality, we have reduced the time needed each morning to manually create similar reports

				and given the support team the ability to be more proactive with investigation.

General changes

The following changes have been made to internal functionality:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
DCMC-284	21792894	Defect	CONNECT - TIF Con is causing Â character to be added to every blank line during decoding	A defect was raised regarding ' ' causing the 'Â' character to show on every blank line of API documents after passing through TIF conversion. This has now been fixed and will now show blank spaces instead of the 'Â' character.
DCMC-322	N/A	Task	132 Automation Scripting	Placeholder for automation scripting.
DCMC-323	N/A	Task	132 Regression | Automation Testing	Placeholder for automation testing.
DCMC-332	N/A	Task	SonarQube Tech Debt	Placeholder for technical efficiency.
DCMC-350	N/A	Task	133 Automation Scripting	Placeholder for automation scripting.
DCMC-351	N/A	Task	133 Regression | Automation Testing	Placeholder for automation testing.
DCMC-378	N/A	Task	Automation Task 134	Placeholder for automation testing.
