

Docman 75000.42

Internal Release Notes

Report created at: 16/07/2020

Notes / Special Instructions: N/A

This release contains the following items:

JIRA ID	ServiceNow Ref	Area	Type	Title	Description
DEDT-444	N/A	GP	Task	DM75 - PFS - Investigate EMIS API and the calls needed for PFS	Placeholder for investigative work into how the new EMIS API calls work.
DEDT-440	N/A	GP	New Feature	DM75 - PFS - Set Patient Visibility when filing a document that isn't being workflowed	A new feature has been added which allows the Docman users to make documents available to the patients from Docman using the EMIS API. If a document is being filed to the clinical system, users will now find a new check box of 'Visible to Patient'. If the document is NOT being workflowed but filed to the clinical system then the 'Visible to Patient' option will be ticked by default. All user actions will be captured in the audits.
DEDT-439	N/A	GP	New Feature	DM75 - PFS - Create a feature toggle to turn on the Visible to Patient feature	New toggle feature added to FSP (Full System Preferences) which allows PCTI users to turn on EMIS PFS functionality.
DEDT-443	N/A	GP	New Feature	DM75 - PFS - Auto Set Patient Visibility when filing a document is being workflowed	A new feature has been added which allows the Docman users to make documents available to the patients from Docman using the EMIS API. If a document is being filed to the clinical system, users will now find a new check box of 'Visible to Patient'. If the document IS being workflowed then the user will not have the option of 'Visible to patient' at the point of filing. When filed into the clinical system the document will be marked as non-visible ('PFSVisible' = false). Each associated workflow user will have the option to make the document visible; the last workflow user will have the option marked by default. All user actions will be captured in the audits.

DEDT-445	N/A	GP	Task	DM75 - PFS - Investigate different workflow types	Placeholder for investigative work.
