General changes	

Overview

This release contains sprints 140 and 141 and includes the following:

- Change to the RIO adapter allowing destinations to reject documents back to sender.
- 2 NHS mail changes to improve delivery and allow better investigation into any processing issues.
- Work related to the DMC SQS project.
- Several defect and bug fixes.

API Changes

This release contains the following API specific changes:

Jira ID	Salesforce Ref	Туре	Title	Description
DCMC-536	N/A	Change	Hotfix 139 DMC SOAP Update and resend option	When sending via the DMC Rio adapter, the option for to reject the document back the sender from the destination site was missing. This was caused by the particular document type used for SOAP but the document type has now been amended to match normal DMC REST documents.

Console Changes

This release contains the following Connect Console specific changes:

Jira ID	Salesforce Ref	Туре	Title	Description
DCMC-406	N/A	Bug	We are navigating to Page not available on editing the current user details	On editing the current sending admin user detail, PCTI users were presented with a 'Page not found' error. This has now been resolved and the error is no longer presented to PCTI users.
DCMC-523	N/A	Bug	Document preview is not shown full screen	A bug was found in development when using the document preview, the page preview was cutting off more than half of the document making it difficult to read. This has now been fixed and the document preview now presents the full document.
DCMC-530	N/A	Bug	Unable to create Connect organisations	When attempting to create organisations on the current development branch, the LastPatientExtractDate parameter was not mapped to the creation SQL, causing an exception to be thrown. This has now been resolved and no longer occurs.
DCMC-538	N/A	Bug	Unlock time, locked documents change	A deadlocking issue was identified in the exchange collector when trying to unlock document. This was caused by an update query that unlocked captured document that were in this state for longer than 10 minutes. This query was locking all rows where the locked column = TRUE due to the index that was in place. We now use the SELECT query to retrieve the document Id's to unlock, and then only performs the update on the required rows.

General changes

The following changes have been made to internal functionality:

Jira ID	Salesforce Ref	Type	Title	Description
DCMC-426	N/A	Story	SQS Workflow Engine - message logic	This story relates to the DMC SQS project and involves the creation of the workflow engine message logic. This ticket includes TIF Conversion logic, Spine Checker logic and File Size Check logic.
DCMC-473	N/A	Story	OCR Processor logic	As part of the above workflow engine message logic work, this story relates to the creation of the OCR processor logic.
DCMC-512	N/A	Task	Automation Testing 140	Placeholder for automation testing.
DCMC-532	N/A	Task	Regression Test case suite	Creation of test cases in the regression test case suite.
DCMC-489	N/A	Story	NHS Mail Store email details in all instances	A change has been made to the way NHS mail documents are captured and stored in Connect. Connect will not collect and store the email body which will allow easy identification of any NHS mail documents which have failed for any reason.
DCMC-496	N/A	Story	NHS Mail Confirm the delivery of a document	A change has been made to the delivery of NHS mail documents, when a document has errored during processing, the email is moved to the DocmanExceptions folder as expected, however this now happens before the database status is upgraded to 'Rejection Resolved'.
DCMC-528	N/A	Task	Automation Testing 141	Placeholder for automation testing.
DCMC-588	21862536	Defect	Investigation for the docs to be resent once the endpoint type has changed to TPP MESH and to be logged into the audit	Several documents needed resending after the destination type changed to TPP MESH. A script was created and handed over to CloudOps which resent the document, changed the document status, and log this change in the audits.
