Overview 1
API Changes 2
Console Changes 3
General changes 4

Overview

This release contains sprints 146, 147 and 148 and includes the following:

- A change to a Share API call.
- Stories related to the message logic used for the SQS workflow engine.

API Changes

This release contains the following API specific changes:

Jira ID	Salesforce Ref	Type	Title	Description
DCMC-834	21974995	Defect	Third Party Unable to Retrieve from Share API	A change was made to the API in preparation for the use from PEPR. This change shouldn't have caused any issues for existing customers however when calling the API, one customer was reporting an issue with documents not being returned. This was caused by "FolderName" being added to the wrong API call. "FolderName" has now been removed and the API should now work as intended once again.

Console Changes

This release contains the following Connect Console specific changes:

Jira ID	Salesforce Ref	Type	Title	Description
DCMC-782	N/A	Change	Change filing details check box labels	A change has been made to the check boxes on the Capture console filing details screen. Upon clicking the label e.g. Medication Change or Urgent, the checkbox will now be ticked.

General changes

The following changes have been made to internal functionality:

Jira ID	Salesforce Ref	Type	Title	Description
DCMC-772	N/A	Task	145 Regression Testing	Placeholder for sprint 145 regression testing.
DCMC-819	N/A	Task	Test Automation	Placeholder for automation testing.
DCMC-472	N/A	Story	Pdf Conversion logic	The message logic for the SQS workflow engine has now been complete for PDF conversion. This will pick-up any messages from the workflow engine, convert any relevant documents to PDF format and feed the message back into the workflow engine ready for the next process.
DCMC-474	N/A	Story	Document Sender logic	The message logic for the SQS workflow engine has now been complete for the Document Sender. This will pick-up any messages from the workflow engine and send the documents to the relevant destination endpoint/organisation type.
DCMC-610	N/A	Story	SQS Testing - File Size Checker logic	Testing story created for the file size checker logic for the SQS workflow engine.
DCMC-678	N/A	Story	Confirm successful delivery of TPP MESH documents	In order to allow the support team, the ability to determine which MESH sites are not accepting documents, we have now added successful infrastructure acknowledgments to the document audits/timelines.
DCMC-832	N/A	Story	SQS testing - Spine Checker logic	Testing story created for the Spine checker logic for the SQS workflow engine.
DCMC-833	22014604	Defect	Connect | NHSmail 'Failed to Store File' error	The support teams previously had no way of handling NHS mail documents that error with the following error message: 'Error ID XXXXXXXX for Connect ID XXXXXXXXX - Message: Failed to Store File (7006)' PCTI users now have the ability to set documents with this error message to Rejection Resolved status once the

				document has been handled appropriately.
DCMC-848	N/A	Task	Automation testing	Placeholder for automation testing.
DCMC-780	N/A	Story	FHIR Accreditation | Sender_ITK_Response_30004	A new ITK response code was added to the FHIR conformance checklist. The response code 30004 is now handled appropriately.
DCMC-781	N/A	Story	FHIR Accreditation | Sender Requirements NON PDS Connected Systems - FHIR-DEM-02.1	An amendment has been made to the FHIR document validation so that if an NHS number is not provided upon creating a FHIR transfer of care document, then the following fields become mandatory in line with the specifications: - First Given Name - Surname - Gender - Date of Birth - Address - Postcode
DCMC-850	N/A	Story	Allow endpoints to receive FHIR and continue to receive other document types as normal.	Previously if a destination endpoint was 'FHIR Enabled', the endpoint could receive FHIR documents only. This has now been changed so if an endpoint is 'FHIR Enabled' they can continue to receive documents in the normal manner however also have the ability to receive FHIR documents.
DCMC-907	N/A	Task	148 Automation testing	Placeholder for automation testing.
DCMC-867	NA	Bug	Documents with .TIFF file extensions EMIS problem	A recent fix was applied to Connect to stop sending .TIFF files to EMIS destination type, however after releasing the fix, the same issue was still occurring. This was caused the dot in the file extension not being considered. This has now been resolved and this issue should no longer occur.
