This document contains confidential and / or proprietary information. The content must not be disclosed to third parties without the prior written approval of Advanced Computer Software Group Limited or one of its subsidiaries as appropriate (each referred to as “Advanced”). External recipients may only use the information contained in this document for the purposes of evaluation of the information and entering into discussions with Advanced and for no other purpose.

Whilst Advanced endeavours to ensure that the information in this document is correct and has been prepared in good faith, the information is subject to change and no representation or warranty is given as to the accuracy or completeness of the information. Advanced does not accept any responsibility or liability for errors or omissions or any liability arising out of its use by external recipients or other third parties.

No information set out or referred to in this document shall form the basis of any contract with an external recipient. Any external recipient requiring the provision of software and/or services shall be required to enter into an agreement with Advanced detailing the terms applicable to the supply of such software and/or services and acknowledging that it has not relied on or been induced to enter into such an agreement by any representation or warranty, save as expressly set out in such agreement.

The software (if any) described in this document is supplied under licence and may be used or copied only in accordance with the terms of such a licence. Issue of this document does not entitle an external recipient to access or use the software described or to be granted such a licence.

The development of Advanced software is continuous and the published information may not reflect the current status. Any particular release of the software may not contain all of the facilities described in this document and / or may contain facilities not described in this document.

Advanced Computer Software Group Limited is a company registered in England and Wales with registration number 05965280 whose registered office is at Ditton Park, Riding Court Road, Datchet, Berkshire. SL3 9LL.

Overview

This release contains development work completed in sprints 153 and 154.

RMS Changes

N/A

GP Changes

This release contains the following GP specific changes:

Jira ID	Salesforce / Service Now Ref	Type	Title	Description
D10-5417		Feature	Use Automated Coding only for part of a document	Users can now filter the list of suggested AI codes based on Current Page, making it easier to manage multiple page clinical letters which may have a very large list of coding terms to sort through.
D10-6226		Feature	Change terminology within Automated Coding	A change in terminology has been applied to replace "Blacklist" with the words "Exclusion" list in all places that this appears within the application.
D10-6231		Feature	PFS Document status set to non-provisional when cancelling a document review	When attempting to cancel a document review at the point of filing, Users will be informed that proceeding with this action will set the document status to Visible for Patient Facing Services and the provisional status will be removed.
D10-5739		Feature	NHS Mail Password Expiry Pop-up	A new pop-up message will now be displayed to all Docman Users when the NHS mail account password has expired, informing them to contact their Administrator. Users with the Electronic Collections Management role will then be able to reset the NHS mail password and validate it in Docman so that email collections can continue to be picked up by Docman as before.
D10-6175		Feature	Update SNOMED browser with latest release of codes	The SNOMED browser has been updated with the latest files from NHS Digital.
D10-6199		Feature	Vision Incremental Patient Sync File Creation date/modification date of file	A change has been to Docbot to use the modification date of a file rather than the file name when running an incremental patient sync with Vision sites. This will allow all files created since the last sync was run to be collected, keeping the patient data in

				Docman up to date with the patient data in the Vision clinical system.
D10-5954	22047462	Defect	Failed Migration	A mismatch of Users between Docman 7 (which users Capital letters) and Docman 10 (which uses Lower case letters) resulted in a migration failing as the Dm10 tenant could not successfully be created on the merge cluster. A fix was applied in which the usernames in Docman 7 were stored in lowercase before checking if the user exists in Docman 10.

General changes

D10-5417 Use Automated Coding only for part of a document

D10-6231 PFS | Document status set to non-provisional when cancelling a document review

D10-5739 Additional NHS Mail Password Expiry Pop-up

All Users who do not have the Electronic Collections Management role will now also see a pop-up to inform them that the NHS Mail account password has expired and needs to be updated. This password update must be performed by Users with the Electronic Collections Management role.
