This document contains confidential and / or proprietary information. The content must not be disclosed to third parties without the prior written approval of Advanced Computer Software Group Limited or one of its subsidiaries as appropriate (each referred to as "Advanced"). External recipients may only use the information contained in this document for the purposes of evaluation of the information and entering into discussions with Advanced and for no other purpose.

Whilst Advanced endeavours to ensure that the information in this document is correct and has been prepared in good faith, the information is subject to change and no representation or warranty is given as to the accuracy or completeness of the information. Advanced does not accept any responsibility or liability for errors or omissions or any liability arising out of its use by external recipients or other third parties.

No information set out or referred to in this document shall form the basis of any contract with an external recipient. Any external recipient requiring the provision of software and/or services shall be required to enter into an agreement with Advanced detailing the terms applicable to the supply of such software and/or services and acknowledging that it has not relied on or been induced to enter into such an agreement by any representation or warranty, save as expressly set out in such agreement.

The software (if any) described in this document is supplied under licence and may be used or copied only in accordance with the terms of such a licence. Issue of this document does not entitle an external recipient to access or use the software described or to be granted such a licence.

The development of Advanced software is continuous and the published information may not reflect the current status. Any particular release of the software may not contain all of the facilities described in this document and / or may contain facilities not described in this document.

Advanced Computer Software Group Limited is a company registered in England and Wales with registration number 05965280 whose registered office is at Ditton Park, Riding Court Road, Datchet, Berkshire. SL3 9LL.

Overview

This release contains development work completed in sprints 155 and 156 with notable fixes applied to the way that HL7 ADT messages are processed by RMS.

RMS Changes

| Jira ID | Salesforce / Service Now Ref | Type | Title | Description |
|-----------|------------------------------|---------|---|--|
| DCMC-1092 | | Feature | DocBot ADT Processing Modification | A change has been applied to the behaviour of HL7 ADT update messages. When receiving an A08 or A31 message with a patient reference that does not exist, it will now create a new patient record with all the data values in the message. If a patient reference already exists, the existing record will be updated as per current behaviour. |
| D10-5678 | 22000207 | Defect | Unable to file documents | When attempting to file a document Users on the P3 stack reported being presented with the following error on screen, "We are experiencing an issue and are looking in to it." A fix has now been implemented. |
| D10-6506 | | Bug | Error in HL7 Patient update progressing with legitimate repeated segments | When sending HL7 messages containing duplicate data segments this would previously cause the code to error and prevent any further messages from being processed. A change has now been applied to the code to accept HL7 ADT messages containing legitimate duplicate segments such as Next of Kin so that these can be successfully processed. |
| D10-6530 | | Bug | Patient Upload does not accept blank NHS numbers | A blank NHS number can be provided as part of a patient upload to RMS to accommodate patients receiving care that may not have an NHS number. |
| D10-6529 | | Bug | Blank Date of Death does not overwrite existing value | Currently we check that an incoming Date of Death value is a valid date and only update the patient record if it is. A fix has now been applied so that HL7 messages can correctly clear Date of Death values in cases where this information may have been sent in error. |

GP Changes
