## What's New?

**NEW****DM10 - Track who rejected a document**

A new feature was added to Connect that allowed Docman10X to pass back the username of the user who rejected a document from the destination organisation. Although Connect had added this functionality, Docman10X was not utilising this functionality.

This has now been added to Docman10X and the username against a rejected document will now show in the Connect document "Information field" after the rejection reason the end user selected.

Example: "REJ03 – Incomplete Document; Name: JBLOGGS"

## Defect Fixes

No Defect fixes this time.

## Background Changes

**BUG****Organisation Dropdown displaying wrong data**

A bug was identified where when searching and selecting an organisation in any organisation drop-down filters, after applying the required filters, the wrong organisation would show in the organisation field. This issue was caused by a subsequent search that was run after the filtering had been applied. This meant that if the original search was based on the organisation description rather than the ODS code, the results after the filter was applied would show an ODS search.
