What's New?

NEW

- Changed the way in which some fields populate on the filing screen; all fields will now instead populate when the selections are clicked instead of when hovered-over with the cursor.

Fixes

- Fixed an issue where after selecting 'Add to Document Clipboard' at the 'Create Review' stage after filing would present an error if 'Create Document Review' was cancelled and re-attempted 3 times.
Case: 22945780
 - Fixed an issue where historic notification descriptions would appear incorrectly after amending and saving Filing Details for a document linked to an active Clinical API Failure notification, the description of that notification would then appear on all other Notifications (such as Patient Access, Deleted Document etc).
Case: 23009342
 - Fixed an issue when searching within the 'Document Library' which would cause an error to appear when 'Search Document Content' is enabled.
Case: 22957936
 - Fixed an issue within RMS10 which caused the inability to save a 'Task View' when 'Include groups and roles user is a member of?' was selected.
Case: 23051214
