What's New.

NEW

- Made various User Interface changes throughout the application to improve accessibility, such as improving the contrast of some text on backgrounds, adding outlines to buttons and adjusting font sizes.

FIXES

- Fixed a bug where in a specific circumstance it was possible to create two users with the same username.
- Fixed an issue where inactive sites with active redirects would still be visible to send to, if the redirecting site is made inactive it should not appear as a potential recipient, the redirected site should be sent to directly.
- Fixed a bug where ExternalSystemID was being removed upon Update & Resending a document.
- The text "Urgent Treatment Centre" within a document will now be detected as a department and suggested.
- Fixed an issue where logging in as a CCG user and navigating to another page under 'Sending' was causing organisation data to not display.
- Now filtering documents by the 'REJ06' rejection code will return all REJ06 rejected documents, ignoring the different custom reasons.
-

Kind regards.
