# Patch Fixes Since Release v226.7

## Unable 'Update and Resend Document' to mesh endpoint

Case <23710848> | Internal reference DCMC-4094

### **Problem**

When a document is rejected by a Docman 10 site because the patient is not registered there, the sender has the option to 'Update and Resend' the document to another practice via the Connect Console. However, when users have tried to 'Update and Resend' a document to a MESH endpoint, they receive an error which states "Delivery Console Error occurred while sending the selected document".

### **Resolution**

Following investigation, it was identified that a null object reference was causing this error message. The null object reference has been resolved so that users can 'Update and Resend' documents to MESH endpoints.

# Current Issues

## File Size 'bloating' post conversion

Internal reference DCMC-3480

### ***Problem***

Docman Connect currently uses Aspose.Word and Aspose.PDF as part of the document conversion process. Issues around file size bloating have been reported by numerous customers and internal staff and Aspose have acknowledged there is an issue with file size bloating. The team are investigating another conversion tool which can either fully or partially replace Aspose.

**Kind Regards, The Docman Connect Team**
