## Tech Updates

### Docman Connect – Server Software Version Security Updates

Internal reference DCMC-4019

#### **Description**

Following a recent PEN test of the Docman Connect application, it was identified that the server software version was accessible via error messages. To resolve this issue, the server has been reconfigured to not return this software version information and custom error messages have been created to ensure that software version information is not returned.

### Upgrade System.Text.Json to the latest version

Internal reference DCMC-4128

#### **Description**

A vulnerability was flagged related to one of the open-source libraries being used in the Docman Connect application. The System.Text.Json library has been upgraded from version 7.0.3 to the latest version 8.0.4 to close off this vulnerability.

## Current Issues

### File Size 'bloating' post conversion

Internal reference DCMC-3480

#### **Problem**

Docman Connect currently uses Aspose.Word and Aspose.PDF as part of the document conversion process. Issues around file size bloating have been reported by numerous customers and internal staff and Aspose have acknowledged there is an issue with file size bloating. The team are investigating another conversion tool which can either fully or partially replace Aspose.

Kind Regards, The Docman Connect Team
